## Channel 21

HOUSTON, TEXAS

**Circular Polarization Population within Grade a Service Contour**

**1,678,424 persons**

**Population within Grade B Contour**

**3,109,248 persons**

**Population within City Grade Contour**

**909,175 persons**

A Longley-Rice Study indicates that the actual Field Strength of the Grade A Coverage extends beyond the Grade B Contour bringing actual population covered with a viewable signal just under 4 million.

- Grade A = Yellow, green and blue sections of the grid - Reaches 1.6 million
- Grade B = Purple - Extends to Conroe and reaches 3 million (On a good weather day where the sun is shining with no cloud coverage it will reach 3 million)
